Qspider Deccan
Java Full Stack developer

01/2025 – 10/2025 | Pune Maharashtra

- Completed an intensive Java Full Stack course covering end-to-end web application development.
- Developed multiple projects, implementing features such as user authentication, CRUD operations, and database integration.
- Gained practical experience in both front-end and back-end development, as well as in designing responsive applications.

YBI Foundation
Intern

01/2024 – 03/2024 | Pune, Maharashtra

- Used Jupyter notebooks to document data workflows, ensuring reproducibility. Boosted efficiency by integrating cloud platforms with virtualization solutions.
- Advanced data analysis supported by employing novel technological tools.

🧠 SKILLS

- **Languages:** Java, HTML, CSS, JavaScript, SQL
- **Framework:** Spring Boot, Servlet-JSP, Hibernate(ORM)
- **Tools :** Git, GitHub, Figma, Maven, Postman, Eclipse / VS Code
- **Database:** MySQL, PostgreSQL
- **Other Skills:** REST API integration, CRUD operations, Responsive Web Design

📂 PROJECTS

Portfolio Website
- A personal portfolio website to showcase my skills, projects, and achievements. It includes sections such as Home, About, Skills, Projects, and Contact, and is designed with a responsive layout for seamless viewing on all devices.
- The website is built using HTML, CSS, and JavaScript.

Hospital Managemet System
- It is a Java console-based application to manage patients, doctors, and appointments which implemented CRUD operations (Create, Read, Update, Delete) for patients and doctors using JDBC with a MySQL database.
- Enabled appointment booking, viewing, and checking doctor availability.
- Demonstrated practical database integration and user interaction in a real-world hospital management scenario.

NASA API Implemetation
- It is a Spring Boot web application that fetches and displays space-related data from NASA's public APIs, such as the Astronomy Picture of the Day, Mars Rover Photos, and Near-Earth Objects.
- It includes a custom login page built with Thymeleaf and secured using Spring Security. The application provides a user-friendly interface to explore real-time astronomical information dynamically.
